

Dr. Christian Buecker, Geophysicist, Head of Research and Development at DEA Deutsche Erdoel AG (Germany)

Short Biography Christian Buecker (2018)

Special expertise in borehole geophysics, long years of activity on drilling wells in the hydrocarbon industry in Germany and abroad. Multifaceted experience through participation in scientific drilling programs such as the German Continental Deep Drilling Program (Kontinentales Tiefbohrprogramm – KTB), the International Ocean Drilling Program (IODP) and the Cape Roberts Antarctic Drilling Project (CRP). Research residences in Antarctica and New Zealand. Additionally, *member of Science Advisory Boards* in Kiel, Aachen, and Hannover, as well as *lecturer for Borehole Geophysics* at the University of Hamburg. Currently, he is *President of the German Geophysical Society (DGG)*. His professional interests include borehole measurements and a statistically supported objective evaluation of the underlying rock physical parameters.
