

German
Scientific
Earth Probing
Consortium
GESEP e.V.

The German Scientific Earth Probing Consortium, GESEP e.V. invites within the framework of the Colloquium IODP-ICDP of the Deutsche Forschungsgemeinschaft to the

GESEP SCHOOL 2022

at German Research Centre for Geosciences, Potsdam,
November 3 to 4, 2022

„Land-to-Sea Drilling Projects“

New opportunities in amphibious scientific drilling

IODP and ICDP will focus in future on joint projects with a need in terrestrial and marine drilling. This development will create unprecedented opportunities for young scholars in Earth sciences.

The key aspects of this course will comprise:

- Key examples present and future of land-to-sea drilling
- The Chicxulub Crater drilling: on-site experience and research
- Land-to-sea correlation studies such as palynology
- The industry perspective of amphibious drilling

GESEP and the Deutsche Forschungsgemeinschaft invite graduate and PhD students as well as Post-doc scientists to apply. Please send a short CV, your motivation and a letter of support to the GESEP coordinator Ulrich Harms at u.harms@gesep.org. The course will be held in English.

Expenses for travel within Germany and accommodation will be reimbursed according to DFG regulations.

Deadline for application is January 17, 2020
